

# CATIA-2-SOLIDCAM

Precise and correct import of CATIA parts to SolidCAM

## SolidCAM

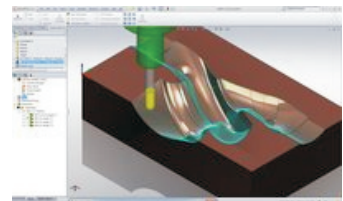

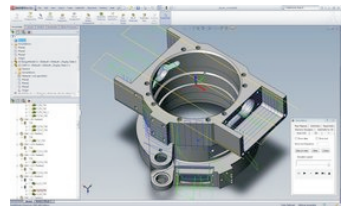

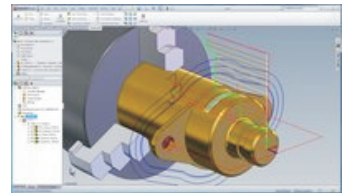

[www.solidcam.com](http://www.solidcam.com)

## Why SolidCAM users need CATIA-2-SolidCAM

- CATIA-2-SolidCAM is a SolidWorks Certified Gold Product Add-in
- Fully integrated "single window" with SolidCAM
- Feels natural for SolidCAM users (no need to learn new user interface)
- Simple access (additional menu in the main tool-bar)
- Designed for precise and correct import of 3D models into SolidCAM (integrated repair&healing)
- Previewing complex parts/assemblies prior to translation
- Selective translation of components from assemblies or complex parts
- More than just translator for CAD formats not supported in SolidWorks
- Extensive functions for precise import (error classification and repair tips)
- Correct and editable CAD models in SolidCAM
- 3D model maintains its original integrity without a risk for model deformation
- More features in the translation (automatic feature recognition)
- Lighter and more correct model conversion from NURBS to analytic representation
- PMI information from CATIA V5 together with 3D model
- Superior IGES or STEP translator
